SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each

requirement, as well as how they use it. The purpose of these requirements are to help employers monitor worker exposure to asbestos, take action to reduce worker exposure to the permissible exposure limit (PEL), monitor worker health, and provide workers with information about their exposure and the health effects of asbestos.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Standard on Asbestos in Shipyards. The agency is requesting a 70 hour decrease adjustment in the burden hours (from 1,108 hours to 1,038). This decrease is due to a decrease in the number of shipyard employees in the preceding paperwork package. OSHA is also requesting a decrease in the total annual cost burden for the exposure monitoring and medical examinations. The estimated burden decreased by \$9,939 (from \$44,578 to \$34,639). This decrease is due to a decrease in the number of shipyard employees found in the preceding package.

OSHA will summarize the comments submitted in response to this notice and will

include this summary in the request to OMB to extend the approval of the information collection requirements.
